

Call us on 01923 270940 or visit us at www.jumpjump.co.uk for help and advice

Welcome to JumpJump Ltd

JumpJump Ltd, is an established inflatable manufacturing Company with 18yrs experience supplying the UK and abroad with safe, high quality and yet affordable inflatables.

Manufacturing from our purpose built factory in Leicester we also have a sales office in Hertfordshire offering further support and a free transportation service to our customers in the South.

We welcome you to our catalogue which provides you with information of our range, designs and the materials used to ensure the highest quality and satisfaction.

Quality and Price

Quality and price are the main factors of what hirers look for...of course! Hirers should ask manufacturers what exactly is in their PVC. Is it just cheap polyester, or does it have integrated nylon? It is important to understand the critical differences between polyester and nylon based PVC: there are significant differences in quality and the inflatable's life.

PVC Quality

JumpJump Ltd manufacture with integrated nylon PVC. It is not cheaply imported, it is made to the best British quality and is simply the best available. We have enough experience to know that the little extra gets you a lot more.

Double Stitching

JumpJump Ltd double stitch all bed seams and protect with 2" webbing.

Standards

We comply with current Health and Safety guidelines and manufacture to PIPA with tagging available.

Repairs Under Warranty

JumpJump Ltd offer a 3 year warranty with on the spot repairs within the UK at Leicester or Watford locations. We know that we use the best products and materials available, so have no problems with giving you a 3 year guarantee on all of our inflatables: we don't want you to have to return your inflatable any more than you do!

Warranty

There is a very important question of warranty and how long the inflatable that you are buying is guaranteed for i.e. 1, 2, or 3 years. Manufacturers that use a poorer quality of PVC know that their inflatables won't last - that's why they'll give you just 1 or 2 years on your new purchase. You also need to bear in mind what happens if you need a repair at any point: does your unit have to be shipped off to Romania or the Ukraine - or will you be able to walk into your supplier and have it done on the spot?

"We inflate quality, not price"

Free Watford collection and drop off (M25 J20 or M1 J6) to Leicester factory.

Welcome to our catalogue - we are excited to show you some of our designs and we feel that you'll be impressed by them. Our catalogue shows only a small sample of our products - we have selected one of each type of main inflatable and have shown many more on our website.

The titles of each page in the catalogue match a section on our website, so take a look at www.jumpjump.co.uk to see more examples once you've decided which kind of inflatable is for you.

See our price list and range online at:
www.JumpJump.co.uk

Through the catalogue there is an information box beside each inflatable, like this one:

Cow JJ-8500-23, 50kg
 8' x 10' (w x l)

On the top line, this gives you the inflatable's name, its reference number, and its weight in kilograms. On the bottom line are the inflatable's dimensions - always width first, followed by length (and for slides, their height and the size of the platform too)

Members of 'The Team'

Come and join us here at the factory for a welcomed tour, the doors are always open.

Melanie Johnston - Director

Mel worked for a Sports Centre in Welwyn 18 years ago teaching children Gymnastics and Trampolining, and decided to go self-employed at the age of 25. "I saw an opportunity in the inflatable industry in 1999. It was apparent that there was a huge demand for inflatables, it was certainly not as popular as it is today and I believe my timing on entering into this industry was perfect. Over the next seven years I built up a reasonable 25 unit strong inflatable hire company and created an indoor play centre in Hertfordshire.

"In April 2005 I purchased Bargain Bouncers who had been my suppliers for all those years. Their inflatables were unique with such high standards of quality and artwork, it was a logical step forward and an honour to purchase this esteemed company. "I feel that my experience in the hire business penetrates through my designs to ensure the continued success of my well established Company.

"I recognise my team to be the best in the industry; I would like to introduce you to them..."

Jeff - Factory Manager and Head Machinist

Jeff is an extremely talented machinist with years of experience producing high quality inflatables. Give Jeff a complex unit to build from scratch and he has the talent to turn it from a sketch into a breathtaking work of art. Jeff has been with JumpJump for over 5 years when previously he worked and trained for Jumbo Inflatables. We are blessed with his skills; and he is a highly respected Team Leader.

Pat - Machinist

A machinist for the last 34 years, Pat has been a member of the team since 2002. Pat is one of the most talented inflatable machinists in this industry and a solid member of the team. Her passion for customer satisfaction is what drives her high standard of work. Additionally, her experience is highly valued not just by us but by our customers as well.

Val - Artist

Val worked for Jumbo originally in 1996 and joined JumpJump in 2003 when their factory relocated. An exceptional artist with great vision and creativity, Val has the experience to ensure each order is as individual as the next. Her innovative creations are almost always guaranteed to give you the "wow" factor, and the pride in her work is shared by us all at Jumpjump.

Alison - Machinist

Alison is JumpJump's soft play guru. She is also exceptionally brilliant in the assembly of inflatables. With precision and flair Alison is one of our most gifted machinists who has been with us since 2002 and who has spent the last 13 years in the inflatables industry. Her attention to detail is a quality we are proud to advertise.

Stu - Machinist

Stu is our very own repair specialist. He will turn a dog-eared inflatable into a quality unit fit for children. A machinist since he was 18 yrs old Stu is yet another talented and valued member of the team, and we are pleased to have him on board with us and benefit from his invaluable skills.

Stu

JumpJump Ltd manufacture with 18oz 610 Nylon Cape Flame Retardant materials. This heavy duty but light weight PVC conforms to the stringent tests required by the industry.

This includes the EN71 test which confirms the product is lead free and organic therefore suitable for soft play, and a further test called BS5438 which is a flame retardant test and ideal for inflatables.

Nylon that is coated with PVC is a superior fabric compared with polyester as it does not stretch or misshape when the inflatable is in use, and it has a leathery finish to it which looks fantastic.

Many companies use polyester to keep costs down. This offers an alternative if price matters but the life of the inflatable will be dramatically shorter. Here at JumpJump Ltd the difference in price is certainly not tremendous for such high quality PVC. If you require a more cost effective version of your ideal inflatable we can offer this lower grade material so please ask for a quote.

Join us as we inflate quality, not price.

Tall Walled Arch

Puppy Love JJ-81000-130, 100 
15' x 15' (w x l)

Jungle JJ-81000-175, 90

(made for Sky One) 18' x 18'

Custom Castle JJ-8700-67, 140kg
18' x 18' (w x l)

Katie's Castle, JJ-8700-66, 80kg
12' x 12' (w x l)

Soft Play

JumpJump Ltd has an in house specialist who will create soft play to suit your young customers' needs, made to order. Puzzles, play areas, ball pits, mats and more, all cushioned with high density foam that has proven to stand the test of time in many of the play areas we have designed and supplied. E-mail sales@jumpjump.co.uk or call the office for a quote.

Ruda Park indoor playcentre

Soft Play shapes are a wonderful product for 1-5 year olds. Small enough to climb, soft enough to tumble on, soft play shapes can also be a learning tool. With endless designs of 3D puzzle, dice and colour matching shapes, the list is wonderfully long.

Setup Guidelines

Hard objects, sharp angles and edges

There shall be no hard and/or sharp angles or edges in any part of the inflatable accessible to the users (e.g. outside seams with a raw edge, square inflated corners, sharp-pointed cones). Users shall not be able to come into contact with any hard object placed inside or adjacent to the inflated structure while it is in use or during accidental deflation. Any hard object positioned over the playing area and supported by air pressure, shall have an additional independent support system.

Electrical installations

Electrical installations shall conform to applicable national standards/regulations. Controls of electrical installations shall not be readily accessible to the public. Electrical cables shall be secured away from users and the public.

Siting

The inflatable shall be sited well away from possible hazards such as overhead powerlines or other obstacles with hazardous projections (e.g. fences and/or trees).

The inflatable shall not be erected on a site with more than a 5% slope in any direction. The site shall be cleared of debris and/or sharp objects on, or embedded in, the surface.

If, for crowd-control purposes, a perimeter fence is used, it shall be at least 1.8 m from walled sides and at least 3.5 m from open sides. A gateway shall be 1.0 m wide (see Figure 1).

Figure 2
Clear area around inflatable

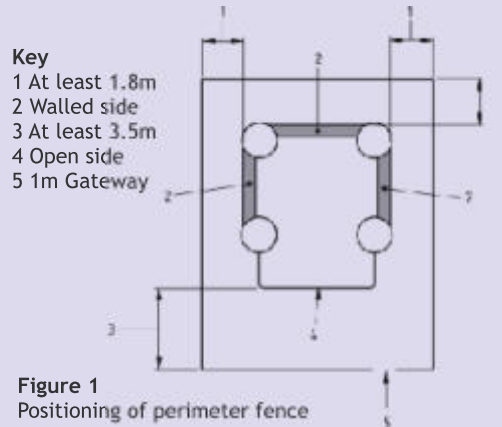

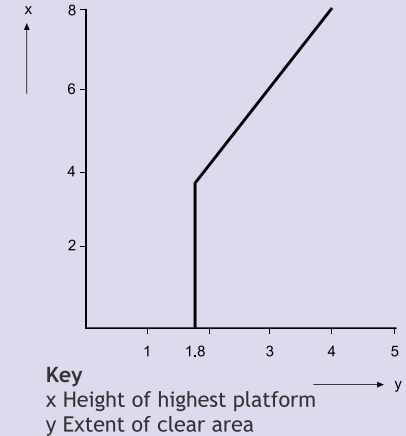

Figure 1
Positioning of perimeter fence

A clear area, free of any obstacle that could cause injury, shall be maintained around the inflatable. The extent of this clear area shall be established by dividing the height of the highest platform by 2. The minimum clear area shall be 1.8m, see Figure 2.

An exception to this rule is when an inflatable with inflated walls is sited directly against a solid wall or walls, for example the walls of a building. In such a case, the solid wall(s) must be 2.0m higher than the highest platform height. Use of this exception shall not result in the creation of additional hazards.

Before you start, clear the ground of stones and lay down your tarpaulin, ensuring you have enough room

Put your inflatable at the back of the tarpaulin sheet and begin unrolling

Connect your inflatable's blower pipe to your blower. Ensure the blower is in a safe place that can't get knocked.

Use weather-proof connectors, plug in, and start inflating

Zip up

Once your inflatable is blown up, you are ready to stake it down securely

To finish, use quality ropes to stake 1' from the tarpaulin on all of sides of your inflatable

Rectangular Trampolines

JumpJump Ltd has 18yrs trampolining experience in this growing industry, and for the first time at the Olympics in Athens 2004 this complex and exciting sport became highly recognised.

Children are drawn to anything that they can jump and bounce on. This motion congers a sense of happiness due to the gravitational pull as they fall back down from jumping upwards.

We offer a massive range of garden trampolines (which will also suit indoor play centres) and Sport Centre trampolines for high level performance/teaching. Please log onto our website for a product and a price list. If you require guidance then please call the office.

Super Tramp Prince 18
10'1" x 5'6" - Max User Weight: 83KG

Super Tramp Super Wallaby
12'5" x 8'3" - Max User Weight: 133KG

Super Tramp Super Bouncer
14'1" diameter - Max User Weight: 140KG

With our 40" diameter PT Bouncer, you don't have to have a large garden to get started with trampolining!

Springtime Tiger
11'9" diameter - Max User Weight: 100KG

Springs used on Super Tramp beds

Go Karts

Our Puky branded Go-Karts are high quality German built karts with automatic freewheeling forward and reverse pedal drive. They have blow-moulded seats, fairing and front bumper for extra strength and durability.

Rustic Three Seater Swing

Douglas Fir Frame and Birds Nest. Age 3 yrs +
Also available in oak, aluminium and steel

Mats

Quality Mats manufactured with the rigorous demands of commercial use in mind.

Not sure what you need? Please call Melanie on 01923 270940 for advice.

Gymnastic Landing Mat

Available in 8", 10" and 12"

One piece cover with velcro fastened flap one end

Anti-Slip Base

Conveniently placed reinforced webbed handles

Ideal for teaching high and difficult dismounts

Deluxe Concertina Mats

Available in 1.5" and 2"

Ideal for Tumbling, Physical

Education and for Basic Work

Anti Slip Base available

Easy to store

Light weight and washable

Inflatable Crash Mats

Made from 2" high density foam

Available with anti slip base

Manufactured with heavy duty zips

Ideal for front step 'fall off' for inflatables

Flexible payment options

1. Cheque
2. Bank transfer
3. Visa and Mastercard credit cards:
3% credit card surcharge
4. Switch, Solo, UK Maestro
and Delta debit cards: no card surcharge

How to order

1. We cannot accept telephone orders so please fax your orders to 0116 260 6639. Call us on 01923 270940 with your requirements and we will produce for you a full quotation first if required.
2. Purchase Orders must include delivery address, invoice address, goods, prices, delivery price, quotation number and credit card surcharge if applicable. Purchase orders should be signed by the authorizing person.

Credit and debit card orders

For credit/debit card orders delivery will only be made to your registered trading address. Please include on your purchase order your card number, expiry date, issue number, last 3 digits on back of card, and card holder name.

Conditions of order

1. Goods are NOT sold on a 'sale or return' evaluation basis. Please make sure that you order carefully.
2. Orders can be cancelled at any point prior to dispatch without penalty. However, if you cancel after the goods have been dispatched you will be charged a 15% restocking fee. We do not exchange products once delivered.
3. If goods arrive damaged or in non-working condition, we must be notified within 2 working days to arrange replacement. The manufacturers warranty takes effect after this 2 day period.
4. For next day deliveries on first time orders we require payment clearance by 2.00 p.m.
5. Please do not book installation of equipment before goods have arrived and have been fully tested. We accept no liability for installation or other costs incurred in the case of late delivery. Courier delays, manufacturer supply problems, etc are beyond our control.

UK mainland delivery charges

Pallets £65-85 (please ask for a quote)

Force Majeure

JumpJump is not liable for delays in delivery or cancellation of your order caused by circumstances beyond its reasonable control. Examples: supplier transport, manufacturers production problems, governmental action and natural disasters.

Warranties

Unless otherwise marked, all inflatable products are new and come with a 3 year manufacturers RTB warranty. All blowers have a 2 year warranty.

Please see terms and conditions listed on our website, www.jumpjump.co.uk

(on the finished catalogue, this is the inside back cover and the orange area is a pocket for price lists and updated information)
